

Paperstone Sustainability KPI report

This report pulls together our sustainability KPIs as part of the Weaver sustainability programme so you can see how we're getting on.

Weaver, created with the brilliant team at Avieco, is all about helping businesses like ours make better choices - whether that's cutting our carbon footprint, reducing waste, using less single-use packaging, or doing more on the social responsibility front.

We're really pleased to have hit Gold Standard across the board. But we're not ones to stand still - we're already looking at what we can do next, because there's always room to do better.

Date: October 2025

Next review: September 2027

Carbon Footprint

- Baseline Greenhouse Gas Emissions (toCO2e).

176.45

Single Use Packaging

- 60-80% of materials used in product packaging are recycled.

60-80%

Social Responsibility

- Policies & procedures are in place to support & protect employees.
- Charity & volunteering programmes are underway.

Sustainable Products

- The (minimum) rate of recycled content in products shown as 'Weaver-approved'.

60%

Waste Management

- Waste recycled 75%.
- Complying with government guidance for waste separation.

75%

Our Targets

- Reduce carbon by 5% annually.
- Plant 5,000 trees per year.
- Expand volunteering and charity programme.
- Reduce, re-use, recycle more each year to achieve zero to landfill.
- Net Zero by 2050.
